Experience

Curii / Jekyll Website and Blog Development 07/2019 – Present

- Develop and maintain 6+ closed and open-source websites
- Engineer responsive websites that follow W3, WCAG, and ARIA standards
- Collaborate with design staff to formulate solid UI and UX design
- Convert legacy WordPress and static websites into Jekyll templates
- Write clear and accessible Documentation

Living Poetry Project / Search, Database and Media Development 11/2020 – 03/2021

- Designed database of poets and composers, using WP Taxonomies & CPT Metadata
- Developed custom media uploader, to overcome WordPress' audio and PDF limitations
- Implemented automated backup and archival of user submissions

haSepharadi / Theme and Plugin Development 03/2018 – 03/2021

- Developed widgets for Affiliate Links, Authors Box, and Zemanim (Jewish prayer times)
- Utilized HTML5 Geolocation and Google Maps APIs to automatically pull user location
- Diagnosed technical issues, while maintaining regular backups and upgrades

Jess Dobkin / Template and Plugin Development 12/2017 – 02/2018

- Transformed static portfolio pages to dynamically alter layout, based on content
- Created custom portfolio project sliders, utilizing the Master Slider jQuery API
- Eliminated technical debt, rewrote site components, and upgraded server to PHP 7

Eye to Eye / Landing Page and Email Development 10/2017 – 12/2017

- Transformed Adobe Photoshop and InDesign mockups into responsive web pages
- Developed modal video player for iOS App landing page
- Developed monthly Constant Contact HTML email newsletters
